

# Capital Improvement Program Development

## State of Oklahoma

Presented by

**Dale Williams**

Airport Development Manager

*Aeronautics Commission*  
**OKLAHOMA**

# Independent Agency

- Separated July 1, 2002
- Channeling Legislation
- Administrative Codes and OASP guide system development

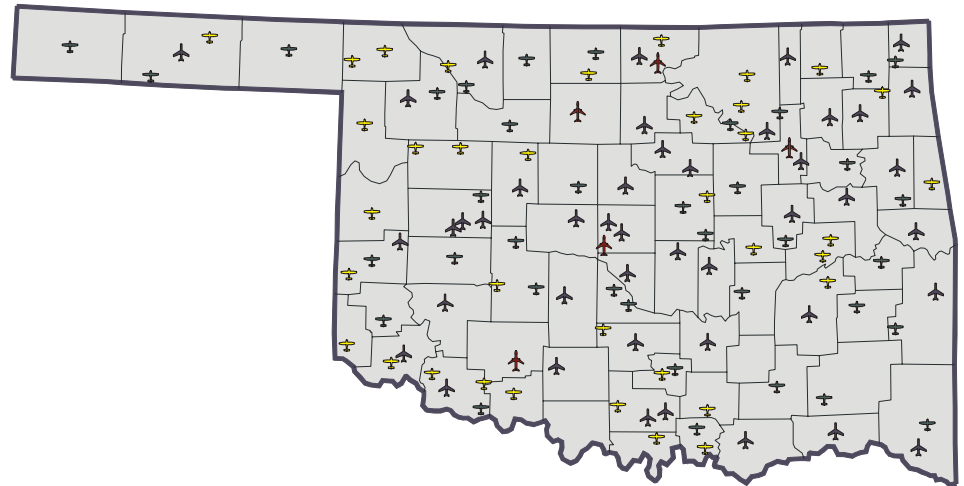

# Oklahoma Administrative Code Title 25

- Establishes OAC administrative procedures
- Establishes airport planning requirements
- Establishes requirements for grant program

# Oklahoma Airport System Plan (OASP)

- Adopted in December 1999
- The state policy used to develop the state airport system
- Communicates the role an airport plays in the system
- Guides classification of system airports

# Regional Business Airport

- Serves multiple communities
- Provides all weather access
- Provides full services
- Provides access for business jets
- 5,000 ft. x 75 ft.

# District Airport

- Provides access for an area not served well by a regional business airport
- Provides some services
- Financially capable airport sponsor
- 4,000 ft. x 60 ft.

# Community Airport

- Serves a small community
- Provides few or no services
- Financially limited airport sponsor
- Preservation projects

# Airport Development Worksheets Evaluation

Staff evaluations are based on:

- Project descriptions, justifications, and cost estimates
- Airport system priorities
- Aircraft operations
- Critical aircraft
- Active based aircraft
- Population service area
- Pavement Condition

# Airport Information

- Construction history
- Pavement type
- Pavement thickness
- General geotechnical information
- Pavement Condition

## Enid Woodring Regional

Branch	Section	Longitudinal Location	Transverse Location	Surface Matl
runway 17-35	CENTER2	1000.0'-6389.0'	50.0'-100.0'	AC

### Total Distresses in Section

Inspected Section Area = 18750 sq. ft out of total section area of 175000 sq. ft

Code	Distress	Severity	Amount
63	Linear Cracking	low	3 slabs
65	Joint Seal Damage	medium	80 slabs
65	Joint Seal Damage	low	20 slabs
66	Small Patch	low	4 slabs
68	Popouts	none	15 slabs
70	Scaling	low	56 slabs
73	Shrinkage Cracking	none	15 slabs
74	Joint Spalling	medium	2 slabs
74	Joint Spalling	low	17 slabs
75	Corner Spalling	low	8 slabs
75	Corner Spalling	medium	1 slabs
71	Settlement	low	26 slabs
72	Shattered Slab	low	2 slabs

# Capital Improvement Program Contents

- The CIP identifies highest priority needs of the airport system and is constrained by funding:

- Project description
- Project cost
- Project justification
- Location of construction
- Funding year and source of funds
- Benefits

Ada Municipal

**DESCRIPTION:** This is a State funded project that will rehabilitate and strengthen the pavement of runway 17/35. The project consists of, (a) asphalt overlay and increase the pavement structural capacity to 30,000 lbs, (b) build shoulders to meet pavement edge drop-off standards, and (c) remark runway 17/35.

**TOTAL PROJECT COST = \$500,000**

**JUSTIFICATION:** Runway 17/35 pavement is exhibiting medium to high severity structural distress. The current PCI for runway 17/35 is 57, which is classified as fair. When the PCI is in the range from 55 to 70, it is considered the pavement condition will rapidly deteriorate to a condition requiring a more costly rehabilitation technique. Based on the PCI being at the low end of the critical range and a site visit by the Commission staff, a 'major rehabilitation' i.e., a structural overlay, is recommended for the runway.

Indicates proposed construction area.

Funding Sources	FY 2005	FY 2006	FY 2007
Commission	\$450,000		
Federal State Apportionment			
Non-Primary Entitlement			
Sponsor	\$50,000		
Total	\$500,000
